

April 30, 2020

Dear Santa Courtney,

We were thrilled to receive the intubation box. We have conducted simulations and found it very easy to use. The design allows for multiple ways to access the patient and freedom to maneuver during procedures. Meeting you was serendipitous! We were on the verge of making our own with less durable materials. No doubt your intubation box will stand the test of time!

The intubation box not only protects our vulnerable patients but all the medical staff during aerolized procedures. Everyone feels safer which means we can better care for our patients.

Thank you for your generosity! We are very grateful for the time, energy and creativity you have shared with us.

With heartfelt gratitude,

Hannaise Cruz Kaberna, MD

Neonatologist

NICU Director Kaiser West LA

*“Thank you so much for taking the time to help keep our patients and our healthcare teams safe in these challenging times. Your innovation has provided us with the reassurance that we will now be well protected at all times, even when other personal protective equipment is running low. We are so appreciative that you took the time and effort to create this tool for us, and am sure it will serve us well in the months and years to come. “*

~ Dr Stephanie Dekom, Neonatologist KP WLA

*“Thank you so much for putting your time and effort into building the aerosol/intubation box custom made for babies. Your contribution makes a significant impact in the care of the tiniest and most fragile of our patient population. It provides protection and safety for our staff during intubation procedures at this time of COVID pandemic. It is heartwarming to know that there are people, like you, who unselfishly share their talent and skills to support us, the frontliners.”*

~ Dr Rose Maun, Neonatologist KP WLA
